

Elk Valley Elementary School Building State Assessment Review

District: 283 Elk Valley

School: Elk Valley Elementary School

Building Number: 283

Grades Served: PreK-5

(A) Identify the barriers that must be overcome for each student to achieve grade level proficiency on assessments.

Some of the key barriers that must be overcome at this school include:

- High percentage/number of free and reduced students and increased poverty rate
- Declining enrollment that reduces funding and access to additional services and supports for students
- High levels or increased levels of student trauma (Adverse Childhood Experiences, ACE Study)
- Lack of or limited access to community health services and mental health services
- Lack of instructional time or changes in instructional opportunities faced during the COVID pandemic created learning loss
- High numbers or increasing numbers of single parent families
- High levels or an increase in absenteeism among our student population
- An increasing level of social emotional challenges and needs of students
- High levels or increased student mobility affects the amount of instructional time we have with highly mobile students and creates instructional issues when students move in or out throughout the school year
- Lack of, limited, or difficulties in engaging parents in the educational process
- Diminishing local control limits our ability to provides supports and services specific to our student and community population
- We believe using one assessment score is not an accurate measure of student success, especially because assessments are written in a way to avoid 100% success for every assessment participant.

(B) Identify the budget actions that should be taken to address and remove those barriers.

Our students face a growing number of barriers to success and this school continually works to support them. Current budget constraints that impact our ability to successfully remove barriers for our students include:

- Additional staff members hired to meet the individual learning and SEL needs of all students

- Increased funding and time for staff development
- Additional substitute teachers for teacher release time
- Increased funding to expand extended school year and summer school programs for students
- Maintain low teacher/pupil ratio for greater individualized instruction
- Increase funding for Pre-K programs
- Allocating budget to focus on prevention, detection and intervention concerning trauma and mental health issues

(C) Identify the amount of time the board estimates it will take for each student to achieve grade level proficiency on the state assessments if the budget actions would be implemented.

There is no way to accurately predict how children will respond to our interventions because we cannot fix the daily challenges they face. Many factors impact students' academic achievement, such as:

- Our ever-changing student population brings a varying degree of cognitive abilities and disabilities which precludes us from being able to guarantee a date when all students will meet a singular level of proficiency.
- The current and future levels of school funding have a significant impact on student learning and any increases or decreases have an affect on student success. Any changes to those funding levels, in either direction, impact the ability of students to meet proficiency criteria.
- While assessment scores are one measure, our school does not believe that student assessment scores should be the sole measure of student proficiency
- Similar to how other professionals, such as doctors, lawyers, etc, cannot ensure 100% success due to a variety of factors and obstacles, we will be unable to achieve 100% proficiency
- Many of the factors that affect student success, such as trauma, poverty, mental health and student disabilities, are out of the local board's control, so giving a time estimate on things that consistently change, or are under the control of other agencies, is not a realistic practice of a local school board.
